Improper fraction to mixed number

Name: _____ Date: _____ Score: _____ / 20

Change each improper fraction to a mixed number, or the other way round.

1. $\frac{39}{7} = \square\frac{\square}{\square}$

2. $\frac{137}{20} = \square\frac{\square}{\square}$

3. $\frac{19}{18} = \square\frac{\square}{\square}$

4. $\frac{29}{14} = \square\frac{\square}{\square}$

5. $\frac{33}{10} = \square\frac{\square}{\square}$

6. $\frac{19}{7} = \square\frac{\square}{\square}$

7. $\frac{45}{16} = \square\frac{\square}{\square}$

8. $\frac{18}{5} = \square\frac{\square}{\square}$

9. $\frac{26}{3} = \square\frac{\square}{\square}$

10. $\frac{57}{14} = \square\frac{\square}{\square}$

11. $\frac{7}{2} = \square\frac{\square}{\square}$

12. $\frac{95}{18} = \square\frac{\square}{\square}$

Improper fraction to mixed number

13 $\frac{29}{10} = \square\frac{\square}{\square}$

14 $\frac{21}{8} = \square\frac{\square}{\square}$

15 $\frac{28}{3} = \square\frac{\square}{\square}$

16 $\frac{49}{18} = \square\frac{\square}{\square}$

17 $\frac{87}{10} = \square\frac{\square}{\square}$

18 $\frac{9}{2} = \square\frac{\square}{\square}$

19 $\frac{93}{16} = \square\frac{\square}{\square}$

20 $\frac{13}{4} = \square\frac{\square}{\square}$
