Improper fraction to mixed number

Name: _____ Date: _____ Score: _____ / 20

Change each improper fraction to a mixed number, or the other way round.

1. $\frac{45}{14} = \square\frac{\square}{\square}$

2. $\frac{183}{20} = \square\frac{\square}{\square}$

3. $\frac{39}{4} = \square\frac{\square}{\square}$

4. $\frac{3}{2} = \square\frac{\square}{\square}$

5. $\frac{10}{3} = \square\frac{\square}{\square}$

6. $\frac{41}{15} = \square\frac{\square}{\square}$

7. $\frac{271}{28} = \square\frac{\square}{\square}$

8. $\frac{60}{7} = \square\frac{\square}{\square}$

9. $\frac{50}{9} = \square\frac{\square}{\square}$

10. $\frac{8}{7} = \square\frac{\square}{\square}$

11. $\frac{110}{21} = \square\frac{\square}{\square}$

12. $\frac{75}{22} = \square\frac{\square}{\square}$

Improper fraction to mixed number

13) $\frac{50}{11} = \square\frac{\square}{\square}$

14) $\frac{62}{7} = \square\frac{\square}{\square}$

15) $\frac{92}{15} = \square\frac{\square}{\square}$

16) $\frac{161}{25} = \square\frac{\square}{\square}$

17) $\frac{71}{8} = \square\frac{\square}{\square}$

18) $\frac{15}{2} = \square\frac{\square}{\square}$

19) $\frac{17}{2} = \square\frac{\square}{\square}$

20) $\frac{9}{2} = \square\frac{\square}{\square}$
