Adding, one denominator divides the other · Answer key

1. $\frac{7}{4} + \frac{11}{12} = \frac{8}{3}$
2. $\frac{2}{3} + \frac{7}{9} = \frac{13}{9}$
3. $\frac{4}{3} + \frac{8}{9} = \frac{20}{9}$
4. $\frac{11}{6} + \frac{3}{2} = \frac{10}{3}$
5. $\frac{3}{8} + \frac{5}{4} = \frac{13}{8}$
6. $\frac{3}{2} + \frac{9}{8} = \frac{21}{8}$
7. $\frac{17}{9} + \frac{5}{3} = \frac{32}{9}$
8. $\frac{7}{6} + \frac{3}{2} = \frac{8}{3}$
9. $\frac{1}{3} + \frac{5}{6} = \frac{7}{6}$
10. $\frac{1}{2} + \frac{7}{10} = \frac{6}{5}$
11. $\frac{1}{8} + \frac{3}{2} = \frac{13}{8}$
12. $\frac{5}{4} + \frac{13}{12} = \frac{7}{3}$
