Equivalentes: tipos mezclados

Nombre: _____ Fecha: _____ Aciertos: _____ / 20

Completa los huecos para que las fracciones sean equivalentes.

Ejemplo $\frac{3}{4} = \frac{6}{\square} = 8$

1. $\frac{3}{5} = \frac{\square}{15}$
2. $\frac{4}{5} = \frac{\square}{25}$
3. $\frac{9}{10} = \frac{27}{\square}$
4. $\frac{9}{10} = \frac{\square}{20}$
5. $\frac{1}{3} = \frac{\square}{12}$
6. $\frac{3}{5} = \frac{9}{\square}$
7. $\frac{5}{6} = \frac{\square}{30}$
8. $\frac{2}{3} = \frac{4}{\square}$
9. $\frac{1}{5} = \frac{\square}{15}$
10. $\frac{1}{5} = \frac{\square}{10}$
11. $\frac{5}{6} = \frac{\square}{24}$
12. $\frac{1}{4} = \frac{4}{\square}$
13. $\frac{1}{4} = \frac{\square}{20}$
14. $\frac{2}{5} = \frac{\square}{15}$
15. $\frac{1}{3} = \frac{4}{\square}$
16. $\frac{3}{5} = \frac{\square}{20}$
17. $\frac{1}{6} = \frac{\square}{12}$
18. $\frac{1}{5} = \frac{2}{\square}$
19. $\frac{7}{8} = \frac{\square}{24}$
20. $\frac{1}{2} = \frac{4}{\square}$
